

## ENSCO At-a-Glance

### Ingenious Solutions

Headquartered near Washington, D.C., with offices throughout the country, ENSCO has a history of innovation and a culture of ingenuity that spans four decades. Our employees are hard at work solving the challenges in a wide range of industries, including defense, security, transportation and aerospace.

## ENSCO Business Areas

ENSCO's engineering and science solutions make a difference in solving the critical challenges that face our nation and our world:

### Avionics

- Safety- and mission-critical engineering solutions for advanced avionics systems
- Tactical synthetic vision systems that allow aircraft pilots to navigate their environments in degraded visual fields

### Rail Technologies

- Advanced rail technology solutions to improve the safety and efficiency of passenger, transit and freight rail markets
- Leader in the delivery of railroad and track safety measuring systems and cars
- State-of-the-art solutions for conventional, high-speed and rapid transit ways throughout the world

## Security

- A unique knowledge management tool for intelligence analysis that brings critical intelligence information to the people that need it
- Custom Positioning, Navigation and Timing technologies for government, commercial and overseas customers to facilitate reliable ranging, locating and tracking solutions to people and assets in the most demanding GPS denied or impaired environments
- A human presence detection system that accurately detects humans hiding in vehicles without a need for manual inspection

## Weather

- Electronic flight bag that brings weather and other critical information to pilots on their mobile devices
- Clear air turbulence prediction to increase the safety of passengers and crew on major airlines

## Aerospace

- Space launch scenario modeling to provide cost-efficient safety training for controllers
- Space launch range expertise in designing the architecture of the launch ranges of the future
