

MicroSearch® – Human Presence Detection System Now Offers Wireless Sensors

Newest offering provides same reliable detection you've come to expect with added convenience of wireless sensors

Same Reliability

- Detection capability and accuracy equals that of wired sensors
- Both vehicle and ground sensors available

Improved Convenience

- Combination of wired and wireless sensors for operation provides maximum operational convenience and efficiency
- Completely interchangeable with wired sensors at any time

Ease of Use

- Easily installed by end user – no calibration or special installation necessary
- Wireless receivers easily mount in existing NEMA CMS enclosure (separate enclosure also available)

No Additional Investment Needed

- Completely compatible with any MicroSearch G3.0, G3.5, or G4.0 system
- Wireless receiver plugs into existing control box with no modifications
- Wireless transmitter included in weatherproof sensor housing

Sensor Features

- Weatherproof polycarbonate housing
- Transmitter, antenna and battery pack fully protected by weatherproof polycarbonate housing
- Powered by two (2) standard AA batteries with easy access battery compartment
- Rechargeable batteries available
- Includes on/off switch on each sensor to save battery life
